## ABOUT Agora University of Oradea (UAO)

*Motto: Acces la succes!*

### Excerpts from the UAO Charter

Agora University in Oradea, established and accredited by Law 59/2012, is identified by the following elements:

1) Official name according to Law 59/2012: Agora University of Oradea; 2) Category: Higher education institution, legal person of private law and public utility; 3) Short name: Agora University; 4) Acronym: UAO; 5) Headquarters: Piața Tineretului no. 8, postal code 410526, Oradea, Bihor county, Romania; 6) Motto: "Access to success!" 7) University Day: March 17; 8) University website: <http://univagora.ro>; 9) Signs: emblem; seal; flag (university emblem on white background); ceremonial attire: robe and headdress.

The mission of Agora University is based on the initial vision of the founders, who chose as a name, not coincidentally, a symbol of democracy. The democratic spirit of the Agora has been and will be the guiding vector of its development and will bring in the future innovative added value, dynamism and a harmonious development. In their vision, the founders understood that encouraging the free and bold thinking and expression of students and teachers and research in Agora, opening up to the co-opting of leading professionals and external scientific and cultural figures, can lead to the achievement or even exceeding in a short time the performances of larger academic institutions with a longer tradition.

Agora University is committed to transmitting to its students the spirit of the Agora, based on the values of democracy and transdisciplinary humanism, a spirit that graduates, in turn, to spread further in society. Starting from the present accumulations and capitalizing on the internal potential, with openness to external collaborations, Agora University aims to add new values to human knowledge, by promoting and encouraging research-development-innovation, assuming a mission of education and scientific research, so that to become recognized, in the Romanian and European academic environment, as an efficient model of access to success through entrepreneurship.

Agora University aims to become a cultural and civic center, designed to contribute to the formation and dissemination of national and universal culture values, to promote the pluralism of options to the development of political and civic culture, and through its graduates and its own scientific research to contribute to improving performance obtained by the economic units from western Romania.

## Evaluation and accreditation

Agora University is a young university (founded in 2000) - but dynamic and active, small (in terms of number of students and staff) - but with prestigious national and international collaborations. Instead of a quantitative development we prefer a qualitative one.

**EUA-IEP Team about UAO:** "The team has enjoyed learning about the characteristics of Agora University and its role as **an entrepreneurial provider of higher education in the fields of law, management and social science**. It has been an interesting experience to discuss with staff, students, and external stakeholders the challenges faced by UAO and the university's efforts to address constraints and to explore future opportunities. We believe the university has the potential to take successful steps in its next stage of development."

## Research in UAO

### Research regulations

- Regulation on the organization, functioning and financing of scientific research at UAO level: [PDF](#);
- Regulations for carrying out scientific research activities of teachers: [PDF](#)

The strategic objectives regarding the research within the Agora University of Oradea, considered in 2019, focused on:

- Development of human resources within the university by participating in various research projects,
- Supporting young researchers, PhD students, from the university and supporting them in order to get involved in internal projects within the university by developing scientific communications and publishing in specialized journals
- Organizing scientific events through partnerships with other universities in the country and abroad as well as with the business and institutional environment
- Organizing scientific events dedicated to students in order to improve their research activity and their involvement in research activity at university level
- Participation of university teachers in a series of domestic and international scientific events in their fields of research

All these objectives derive from the fact that all directions of action at the level of universities have in view an efficient education, and this aspect presupposes a high level of scientific research, in this case a highly qualified human resource.

Within the Agora University of Oradea, four international scientific events took place in 2016 with the participation of teachers from the country and abroad and ten national scientific events with the participation of teachers from the University Agora of Oradea and from other universities in the country, but also people from the business and institutional

environment. Although it has few teachers, Agora University of Oradea, in addition to education, has many research and development projects in various stages of development, some carried out through the Agora Foundation.

By arranging the center, a space was provided in which university teachers and practitioners can organize working meetings during which participants have the opportunity to present particularities of the work they carry out in different institutions. For this purpose, two workshops with international participation were organized, which brought together over 80 specialists from the country and abroad. On Friday, the book "Cross-border crime on the border between present and future" was presented, available in 300 copies. (Source: crisana.ro)
